

## **Family and Community Engagement Program**

Lowndes County Schools are fortunate to participate in a Family Engagement Program which houses a parent resource center at each Title I school. Parents can become involved through the Engagement Team. A Family Engagement Coordinator works with each Title I school to support parental needs. Each school develops a Family Engagement Policy. The Lowndes County School System also has a District Family & Community Engagement Policy to ensure parents are informed and engaged. The Family Engagement Coordinator plays a major role in our support system for parents and bridges the gap between the home, school and community environment.

What services do they offer?

- They assist in maintaining a parent resource center at each school with multi-media materials available for check-out to parents.
- They support and attend monthly Engagement Team meetings at each Title I school.
- They work closely with teachers and parents to meet the needs of the students and parents.
- They provide information concerning other agencies and programs available to the parent and student.
